

## Our Project Description

StreamLink is a crypto-only application that offers different service worldwide like Gift Cards, prepaid mobile Refills, Lightning Network Services to consumers and business enterprises. StreamLink has plans to its customers multiple to shop with StreamLink Token or any crypto-currency with a catalog of prepaid voucher products. Its customers can shop for various services like gaming, entertainment and travel gift cards. Customers who have StreamLink Tokens or any crypto-currency in their wallets would be able to use StreamLink's catalog to purchase digital gift cards and mobile phone refills.

StreamLink App has also enabled crypto payments for reservations made on the booking service which would allow customers to make reservations not only with StreamLink Token and also with other crypto-currency.

Thus, StreamLink is bringing in various exciting features like the "new currency or price display tool." This would help customers to select the view they prefer for different product prices like StreamLink Token or any crypto- currency.

The Product can be purchased by the Customer either;

- Directly with a crypto-currency.
- Via a third-party payment provider.

StreamLink offers different Products depending on the Customer's country. StreamLink allows the Customer to select their country and displays all the offers available in that country.

StreamLink then displays different categories, such as "phone top-ups", "e-commerce", "games", etc.

Once a category is selected, the Products available on StreamLink within such a category are displayed. Upon selection and payment, the Customer will receive access to the Product.

## StreamLink Wallet

### Security and Transparency

StreamLink - Blockchain Wallet is a decentralized wallet that designs for account holders to hold their digital assets and private key belong to them only. StreamLink - Blockchain Wallet is a connection gateway to Blockchain projects just within a second.

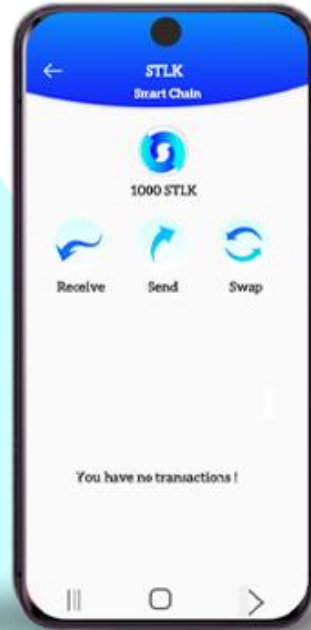

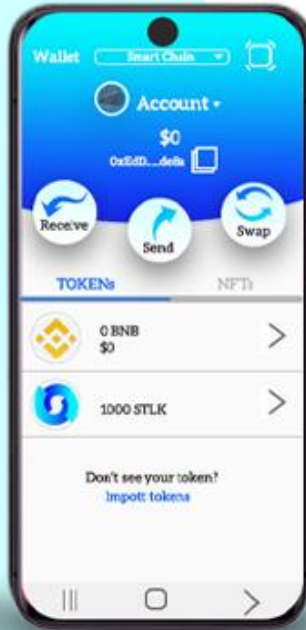

With the basic functions such as storage, withdrawal, deposit, and swapping between crypto - to - crypto. StreamLink Wallet also provides peer crypto - fiat trading features, which allow users to trade any cryptocurrency listed on exchange for fiat with other users within the StreamLink network. For added security, the StreamLink crypto wallet will keep the crypto in escrow while the buyer transfers the fiat directly to the seller.

StreamLink Wallet is a payment method that allows customers to perform purchases by using e-wallets and to make payouts to customers. purchases are performed by using Payment page and Gate, payouts by using Gate. payment processing through the StreamLink Wallet payment method requires the merchant's web service, as well as StreamLink Wallet technical facilities.
